PROFESSIONAL SUMMARY

Senior Backend Engineer with 8+ years of experience building scalable backend systems, APIs, and distributed architectures using Python, Django, FastAPI, and Node.js. Currently lead development of an online booking platform serving 50,000 visits and 10,000 appointments per day. Background includes maintaining 17 production microservices on Kafka and MongoDB, migrating legacy integrations to AWS serverless, and running Airflow pipelines that process 1M+ records daily. Strong in cloud-native engineering (AWS, GCP), CI/CD automation, and observability, with a track record of driving projects from design to production.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, Scala, PHP, C#

Backend: Django, FastAPI, Starlette, Node.js, Express, Laravel, REST APIs, GraphQL, SOAP, Microservices

Frontend: React, Angular, Ionic

Cloud & DevOps: AWS (Lambda, S3, DynamoDB), GCP (BigQuery, Cloud Composer), Docker, GitLab CI/CD, Jenkins, TeamCity

Data Engineering: Kafka, Airflow, PySpark, BigQuery, ETL Pipelines

Databases: PostgreSQL, MongoDB, DynamoDB, Oracle, SQLite

Monitoring: Datadog, Splunk, Axiom, Vector

Enterprise Integration: SAP, TIBCO, 3PL Central (WMS)

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Petco

Feb 2025 – Present

- Lead development of Vet Online Booking, serving around 50,000 visits and 10,000 appointments per day, using React, TypeScript, and Django-backed services.
 - Increased booking conversion by 5 percentage points by redesigning the appointment flow.
 - Migrated a service from a REST API to a GraphQL endpoint, using a shadow release to validate it against production traffic before cutover.
 - Refactor legacy modules to improve application performance, maintainability, and scalability.
 - Extended GitLab CI/CD pipelines with client and server test coverage, an AI code review assistant, and tagged deployments.
 - Collaborate across teams on API integrations, architecture discussions, and production support.
-

Software Engineering Consultant (Contract) | TLNT

Oct 2024 – Feb 2025

- Developed internal applications, reporting systems, and backend services using Python and Starlette.
- Built observability solutions using Vector and Axiom that detect anomalies in real time, cutting incident detection time by about 1 hour.
- Resolved performance bottlenecks and delivered scalable solutions aligned with business requirements.

Software Engineer | Luxoft

Aug 2022 – Oct 2024

- Architected migration of 4 legacy TIBCO integrations for a global quick-service restaurant brand, moving document processing and parameter updates to AWS serverless solutions using Python, Lambda, S3, and DynamoDB.
 - Maintained 17 production microservices for a global online travel company, built with Python, Java, and JavaScript using Kafka and MongoDB.
 - Processed large-scale datasets using Scala and PySpark, supporting 10,000+ active users.
 - Developed monitoring dashboards and alerts using Splunk and Datadog to improve reliability.
 - Deployed services through Jenkins CI/CD pipelines, using Docker for local development environments.
-

Technology Analyst | Infosys

Jun 2021 – Aug 2022

- Maintained and extended a 25-step Python/SQL data pipeline on Google Cloud Composer (Airflow) that automates replenishment of 1M+ BigQuery records daily, adding 2 steps and reducing total run time by 5%.
 - Implemented CI/CD processes using TeamCity and GitHub to improve deployment efficiency.
-

Developer Analyst | GT Logistics

Jan 2019 – Jun 2021

- Led development efforts and mentored 2 junior engineers across logistics technology projects.
 - Architected integrations across 6 systems, including an on-premises CRM, 3PL Central WMS, two TMS platforms, SAP, and a BPM system, using Laravel, Node.js, and REST APIs.
 - Developed real-time shipment visibility solutions using React, Angular, and Ionic.
-

Systems Engineer | Softtek / DXC Technology

Jan 2018 – Jan 2019

- Provided L4 support for enterprise inventory management systems used across the Americas.
 - Maintained C# .NET applications and Oracle database integrations.
 - Resolved 45+ client production tickets and supported release management processes.
-
