

ABRAHAM GEA DIAZ

Senior Backend Engineer | Python | AWS | Distributed Systems | Microservices

956-688-7090 | abrahamgeadiaz@gmail.com | linkedin.com/in/abraham-gea

Work Authorization: Eligible for TN Visa (USMCA)

PROFESSIONAL SUMMARY

Senior Backend Engineer with 8+ years of experience designing and building scalable backend systems, APIs, distributed architectures, and cloud-native applications. Strong background in Python, Django, FastAPI, AWS, Kafka, GraphQL, Airflow, BigQuery, microservices, CI/CD automation, enterprise integrations, real-time data pipelines, observability, and backend performance optimization. Proven experience delivering production systems supporting thousands of users and mission-critical operations.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, Scala, PHP, C#

Backend: Django, FastAPI, Starlette, Node.js, Express, Laravel, RESTful APIs, GraphQL, SOAP, Microservices, Distributed Systems

Cloud & DevOps: AWS Lambda, S3, DynamoDB, GCP BigQuery, Cloud Composer, Docker, GitLab CI/CD, GitHub Actions, Jenkins, TeamCity

Data Engineering: Kafka, Airflow, PySpark, BigQuery, ETL Pipelines

Databases: PostgreSQL, MongoDB, DynamoDB, OracleDB, SQLite

Monitoring: Datadog, Splunk, Axiom, Vector

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Petco Feb 2025 – Present

- Lead development of Vet Online Booking features using React, TypeScript, and Django-backed services.
- Implement integrations with GraphQL and RESTful API services.
- Refactor legacy modules to improve application performance, maintainability, and scalability.
- Manage GitLab CI/CD pipelines and automated testing workflows to accelerate software delivery.
- Collaborate across teams on API integrations, architecture discussions, and production support.

Software Engineering Consultant (Contract) | TLNT Oct 2024 – Feb 2025

- Developed internal applications, reporting systems, and backend services using Python and Starlette.
- Built observability solutions using Vector and Axiom to improve real-time monitoring and incident response.
- Resolved performance bottlenecks and delivered scalable solutions aligned with business requirements.

Software Engineer | Luxoft Aug 2022 – Oct 2024

- Architected migration of legacy TIBCO integrations to AWS serverless solutions using Python, Lambda, S3, and DynamoDB.
- Maintained 17 production microservices built with Python, Java, and JavaScript using Kafka and MongoDB.
- Processed large-scale datasets using Scala and PySpark, supporting 10,000+ active users.
- Developed monitoring dashboards and alerts using Splunk and Datadog to improve reliability.

Technology Analyst | Infosys Jun 2021 – Aug 2022

- Engineered Python data pipelines using Google Cloud Composer (Airflow) to automate replenishment of 1M+ BigQuery records daily.
- Built ETL workflows supporting enterprise reporting and analytics initiatives.
- Implemented CI/CD processes using TeamCity and GitHub to improve deployment efficiency.

Developer Analyst | GT Logistics Jan 2019 – Jun 2021

- Led development efforts and mentored junior engineers across logistics technology projects.
- Architected integrations between WMS, TMS, and CRM platforms using Laravel, Node.js, and REST APIs.
- Developed real-time shipment visibility solutions using React, Angular, and Ionic.

Systems Engineer | Softtek / DXC Technology Jan 2018 – Jan 2019

- Provided L4 support for enterprise inventory management systems used across the Americas.
- Maintained C# .NET applications and Oracle database integrations.
- Resolved production issues and supported release management processes.

EDUCATION & CERTIFICATION

B.S. Information Technology Engineering | Instituto Tecnológico de Ciudad Madero | Professional License #11349397

Microsoft Azure Fundamentals (AZ-900)
